*The Elk herd in Michigan is located in the tip of the mitt of the northern lower peninsula region. They reside in small groups scattered among private and public land. In the past, some Tribal hunters have been fortunate to harvest Elk near a road for an easier haul out, while others have gotten elk and needed a group of friends and family to drag it out. Every hunt is different. Plan on the elk weighing over 400 lbs.*

The questions below are for Natural Resources Department data collection. You will not be excluded from a tag based on your answers. Answer all questions to the best of your knowledge and leave any notes at the bottom.

1.) Have you ever harvested a whitetail Deer?      YES      NO

2.) Have you ever harvested an elk in Michigan under a GTB Tribal Tag? (there is currently a three-year waiting period after obtaining a GTB elk tag).      YES      NO

If yes, what Year \_\_\_\_\_

3.) Have you ever harvested a Bear in Michigan under a GTB Tribal Tag?      YES      NO

If yes, what Year \_\_\_\_\_

4.) If selected, what caliber rifle and bullet will you use? \_\_\_\_\_

5.) Have you completed Hunters Safety? \_\_\_\_\_

If you are successfully drawn and do not intend on using the Elk tag this season, you have until August 20th to return your packet or write a letter rescinding your permit with no penalty and can apply again the following year.

Note that these are coveted tags and a good way to get a freezer full of meat. If this is something you will not use, please allow another tribal member to obtain the tag. If you are ready to harvest an Elk or Bear if selected for a tag initial or sign. \_\_\_\_\_
