ANNOUNCING NINETEEN (19) NEW COVID-19 CASES, AT-HOME COVID-19 TESTS, FLU SHOT CLINIC DATES, MONOCLONAL ANTIBODY THERAPY COMING SOON.

November 24, 2021

- **The GTB Health Department is reporting nineteen (19) new positive COVID-19 cases from November 17th through November 23rd.** The local health departments for Grand Traverse, Leelanau, Benzie, and Kalkaska counties were notified as the county of residence. We are continuing to see a sharp increase in cases. Please continue to take measures to reduce spread including vaccination, wearing face masks, avoiding crowded or poorly ventilated settings, staying home when ill, seeking testing if symptomatic or exposed, and frequent handwashing.

Due to the sharp increase in cases, the GTB Health Department will resume pre-appointment testing for all in-person appointments. Also, if you would like to obtain an at-home COVID-19 test kit at no cost, please call 231-534-7200 to make a request. You can use at-home testing to reduce the risk of spreading the virus during this holiday season and celebrate safely.

- **During the holidays, the GTB Health Department will hold its drive-through flu-shot clinics on December 21st and December 28th from 2pm to 4pm at the Medicine Lodge.** For all other dates, the drive-through flu-shot clinics will continue on Thursdays from 2pm to 4pm at the Medicine Lodge, as usual.
- *****IMPORTANT: The GTB Health Department is continuing to schedule vaccination clinics for booster shots and children ages 5 to 11.** After school hours will be offered in order to vaccinate as many eligible children as possible. You should get a booster shot if you are 18 and older. If you received Pfizer or Moderna, you can receive a booster at 6 months after completing your primary COVID-19 vaccination series. If you received Johnson & Johnson, you should receive a booster at least 2 months after your shot. Any of the COVID-19 vaccines authorized in the United States can be used for a booster dose.

Please contact the GTB COVID-19 Vaccination Line (231-534-7475) if you would like to schedule a pediatric vaccination or for any questions you may have.

You may use the following links to self-schedule a booster shot or your primary doses. Alternatively, you can call the GTB COVID-19 Vaccination Line (231-534-7475).

The GTB Health Department has now administered 4,391 doses. Currently, 59% of GTB tribal members age 12 and over and 82% of GTB elders age 55 and over in the 6-county service area are vaccinated.

- **The GTB Health Department is working to bring Monoclonal Antibody Therapy to the GTB community soon.** Details will be announced in future communications. These treatments are authorized for high-risk patients for treatment of mild to moderate COVID-19 and post-exposure prophylaxis in high-risk patients. Clinical trials in high-risk, positive patients have reported 70% reduction in hospitalizations or deaths. As post-exposure prophylaxis, 98.5% of patients in one trial remained asymptomatic and for those who became symptomatic, symptoms resolved sooner than the placebo group. High-risk criteria for severe disease include older age (e.g. 65 or greater), BMI of 25 or greater, pregnancy, chronic kidney disease, diabetes, immunosuppressive disease, currently receiving immunosuppressive treatment, cardiovascular disease, hypertension, chronic lung diseases, sickle cell disease, neurodevelopment disorders or other conditions that confer medical complexity, having a medical-related technological dependence not related to COVID-19 (e.g. tracheostomy), other medical conditions or factors that place the patient at high risk for progression to severe COVID-19.
- **Below is summary information for the 281 cumulative positive cases to-date tested at the GTB Health Department:**
 - 40 cases in August 2021.
 - 22 cases in September 2021.
 - 18 cases in October 2021.
 - 39 cases thus far in November 2021.
 - 42 breakthrough cases to date.

By Age

- 0-20 – 80 cases
- 20-29 yrs – 54 cases
- 30-39 yrs – 50 cases
- 40-49 yrs – 37 case
- 50-59 yrs – 28 cases

The Grand Traverse Band of Ottawa and Chippewa Indians

2605 N. West Bay Shore Drive • Peshawbestown, MI 49682-9275 • (231) 534-7211

- 60-69 yrs – 21 cases
- 70-79 yrs – 6 cases
- 80-89 yrs – 4 cases
- >89 yrs – 1 case

By County

- Leelanau – 105
- Benzie – 10
- Grand Traverse – 131
- Kalkaska – 5
- Manistee – 2
- Charlevoix – 8
- Antrim -19
- Ingham – 1

***There are more active cases in the community that were tested at other facilities that are not included in this tally.

If you would like to get tested for COVID-19, please call the clinic at (231)-534-7200 to get on the daily testing schedule. We ask that all individuals tested appear on the testing schedule. Please note, the GTB Health Department tests tribal members and families, government employees, government entities, and essential support groups to GTB when possible.

Respectfully,

Soumit Pendharkar, MHA, FACHE
Health Administrator
