Re: Notice of Workplace Exposure

We have been notified by the Grand Traverse Health Department that a customer visiting the Leelanau Sands Casino on August 8th between 8:00pm and 9:00pm has tested positive for COVID-19. The customer walked around playing random slot machines while enjoying a drink and they do not believe they were in close contact (within 6 ft for 15 min) with any guests or employees. According to the Centers for Disease Control and Prevention (CDC), the virus is thought to spread mainly between people who are in close contact with one another (within about 6 feet for 15 or more minutes) through respiratory droplets produced when an infected person coughs or sneezes.

The Grand Traverse Resort and Casinos is taking measures to ensure the safety of our employees during this coronavirus outbreak, including disinfecting exposed areas and working with the local health department.

If you were at this location during the listed time period, you should self-monitor for COVID-19 symptoms for 14 days since the possible exposure, particularly if you were not wearing a mask or maintaining 6-foot distance from others. Symptoms include fever, cough, shortness of breath, vomiting, diarrhea, muscle aches, repeated shaking with chills, headache, sore throat, and new loss of taste or smell. Anyone that is self-monitoring, as a result, should keep away from the public, family, close contacts and roommates as much as possible.

Anyone who was identified as a close contact is contacted directly by the Grand Traverse County Health Department individually and told to quarantine.

For more information on COVID-19, including symptoms and treatment, visit the CDC website at www.cdc.gov.
